Overview

Extension Conflict is a Magento extension designed to help Magento developers to identify conflicts between installed extensions on a server.

This extension also displays a solution enabling them to fix the conflict.

With Extension Conflict, developers can also submit a config.xml file from another extension, enabling them to test whether its installation would raise conflict with already installed extensions.

Installation

Before file upload, it is recommended to enable Magento Cache

Source	Target	Comment
App	/	

Once all files are uploaded, you have to refresh magento cache and log out and login from admin panel (to reset permissions)

How to use

The main screen is available under menu System > Extension conflict.

After installation and all extension installation, you must click on the Refresh button

Extension Conflicts Refresh

Important Notice

This tool is provided "as is" and the solution displayed below may not work in every situations
We highly recommend to test this on a development server before applying this modification on a production server
Maison du Logiciel cant be responsible for any data lose or server errors

Conflict Information

Core module	adminhtml
Core class	blocks_catalog_product_edit_tabs
Rewrite classes	MDN_ExternalLogistic_Block_Product_Edit_Tabs, MDN_Organizer_Block_Adminhtml_Catalog_Product_Edit_Tabs

Solution

1. Remove rewrite declaration :

Edit file D:\maison du logiciel\clients\magento\christian louboutin\CLOUBOUTIN-05845_02894_v2-6\app\code\MDN\ExternalLogistic\etc\config.xml
Remove code : <blocks_catalog_product_edit_tabs>MDN_ExternalLogistic_Block_Product_Edit_Tabs</blocks_catalog_product_edit_tabs>

2. Change class declaration

Edit file D:\maison du logiciel\clients\magento\christian louboutin\CLOUBOUTIN-05845_02894_v2-6\app\code\community\MDN\Organizer\Block\Adminhtml\Catalog\Product>EditTabs.php
Replace class declaration "class MDN_Organizer_Block_Adminhtml_Catalog_Product_Edit_Tabs extends Mage_Adminhtml_Block_Catalog_Product_Edit_Tabs" with "class MDN_Organizer_Block_Adminhtml_Catalog_Product_Edit_Tabs extends MDN_ExternalLogistic_Block_Product_Edit_Tabs"

3. Refresh Magento Cache

Important notice : this is only suggestion and may not work in every cases.
