## Overview

Quick product creation is a magento extension designed to easily create magento products. You can select what information are required and what are default values for product attributes. You can then quickly and easily create products

Assistance création produits Ajouter une ligne Créer les produits

#	Type	Attribute set	cost	manufacturer	name *	price *	sku *	status *	Informations de stock	Backorders	Delete
1	simple	Phones	214	Apple	iphon	399	ipho	Enabled	14	No Backorders	
2	simple	Phones	88	HTC	HTC 1	259	htc_	Disabled	0	Allow Qty Below 0	
3	simple	Phones	386	HTC	HTC 7	650	htc7	Enabled	99	No Backorders	

## Installation

### Files copy

Source	Target	Comment
app/code/community/MDN/QuickProductCreation	app/code/community/MDN/	
app/design/adminhtml/default/default/layout/*	app/design/adminhtml/default/default/layout/	
app/design/adminhtml/default/default/template/*	app/design/adminhtml/default/default/template/	
js/mdn/QuickProductCreation.js	js/mdn/	
skin/adminhtml/default/default/images/QuickProductCreation	skin/adminhtml/default/default/images	
app/locale/*	app/locale/	
app/etc/modules/*	app/etc/modules	

Once all files are uploaded, you have to refresh both Magento and index caches

Once caches are refreshed, log out and login from admin panel (to reset permissions)

## Settings

To configure settings, select menu system > configuration > catalog tab > quick product creation

### Attributes

This is the place where you can select required attributes and default values to create product.

This area display every product attributes and for each, you can configure :

- Editable : if enabled, it means that you'll have to fill attribute value in product creation form

- Apply default value : if enabled, the system will apply default value to attribute on product creation
- Default value : select default value for attribute ; note : you need to enabled "Apply default value" to use "default value"

## Stock

Setting	Description
Manage stock	Select stock management value for created products
Display stock input	If enabled, you can fill product stock level for each product in creation form
Display notify qty input	If enabled, you can fill product notify stock level for each product in creation form
Display backorders input	If enabled, you can select backorders behaviour for each product

## Miscellaneous

Setting	Description
Associate product to websites	Select for what websites products are associated
Default attribute set	Select default attribute set for created products. Note: you can change this value for each product in the product creation form

## Create products

To display product creation form, select menu Catalog > Quick Product Creation

Then, creation form is displayed :
