Configuration.....	2
MyFulfillment configuration.....	3
Import catalog section.....	3
MyAds configuration .....	4

## Installation

Boostmyshop module installation does not require anything special, simply go in Prestashop module page, and click on button “Add a new module”.

## BMS Menu

Once the module is installed, a new menu entry Boostmyshop is available :

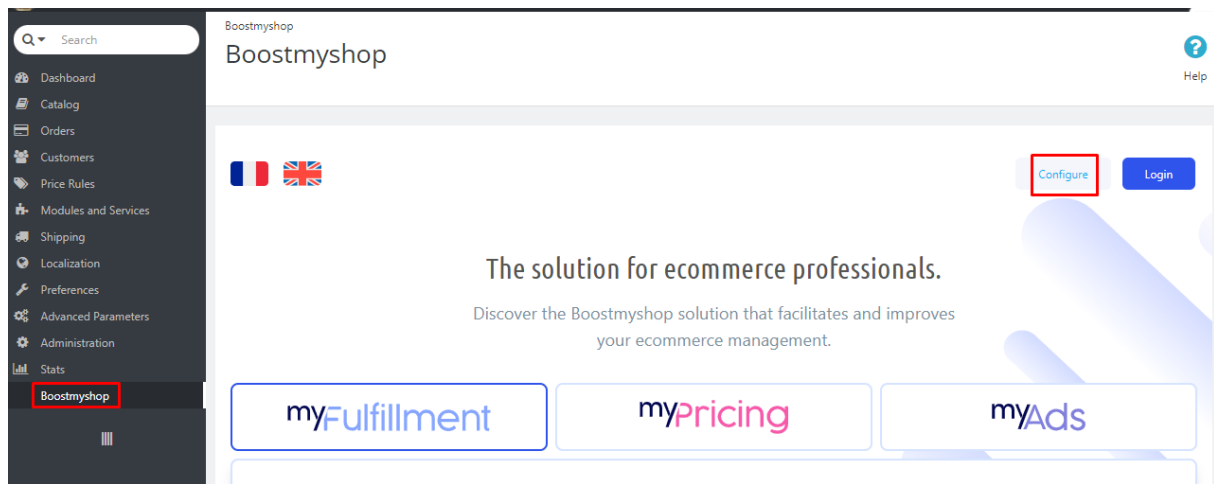

Clicking on this menu show the main Boostmyshop page, from here you can :

- Understand Boostmyshop feature advantages watching the video
- Access to the module configuration click in on the Configure button
- Change language with the top left flags
- Access Boostmyshop App using the Login button

## Configuration

To access to configuration page, select Boostmyshop menu on the left and click on Configure button :

## MyFulfillment configuration

This section allows to link your Prestashop store with MyFulfillment to get orders and product information in Prestashop.

To configure the connection, fill the 3 fields :

- **Server url** : your myfulfillment server url (starting from https until .com)
- **Login** : your myfulfillment login
- **Password** : your myFulfillment password

## Import catalog section

This section allows to get the token to import your catalog in Boostmyshop.

When asked on app.boostmyshop.com, simply copy this token and paste it

 IMPORT YOUR CATALOG IN BOOSTMYSHOP

Token 3d20d32f19440cb5b2a17f660f12c816
